

LTE & 5G Network Management System

Monitors private LTE/5G cores, cells and devices: KPIs, alarms, SIM inventory and SLA.

Featured

Software

Network & RF management

KEY FEATURES

Monitors private LTE/5G cores, cells and devices

KPIs, alarms and SIM inventory

SLA tracking per site and service

Multi-vendor integration

TYPICAL APPLICATIONS

Private network operations centers

Managed services by integrators

Capacity and coverage planning

TECHNICAL HIGHLIGHTS

INTERFACES SNMP, REST, vendor APIs

KPIs Availability, throughput, latency, attach rate

DEPLOYMENT On-premise or cloud

Indicative specifications, confirmed per project.

INDUSTRIES

Mining

Telecom & private networks

Ports & logistics

Energy & utilities

Featured ITTC product, available through vertical partners.

100% B2B. Supplied through ITTC partner companies specialized in each vertical. Contact us for the partner in your sector, a quotation or a technical briefing.
