

Two-way Radio Performance System

Measures coverage and call quality of DMR, P25 and TETRA radio networks across the site.

Featured

Software

Network & RF management

KEY FEATURES

Coverage and call quality of DMR, P25 and TETRA networks

Field measurements with GPS

Repeater and talk-group performance

Coverage maps and reports

TYPICAL APPLICATIONS

Radio network acceptance

Coverage gaps in pits and tunnels

Emergency communication readiness

TECHNICAL HIGHLIGHTS

TECHNOLOGIES	DMR, P25, TETRA, analog
--------------	-------------------------

INPUTS	Field probes and radio logs
--------	-----------------------------

OUTPUTS	Maps, KPIs, PDF reports
---------	-------------------------

Indicative specifications, confirmed per project.

INDUSTRIES

Mining

Oil & gas

Rail & transport

Energy & utilities

Featured ITTC product, available through vertical partners.

100% B2B. Supplied through ITTC partner companies specialized in each vertical. Contact us for the partner in your sector, a quotation or a technical briefing.
