

# IT/OT Network NMS

Unified monitoring of IT, OT and wireless networks: topology, availability, alarms and reports.

Featured

Software

Network &amp; RF management

## KEY FEATURES

Unified monitoring of IT, OT and wireless networks

Auto-discovered topology and inventory

Availability, alarms and performance trends

Role-based dashboards for IT and operations

## TYPICAL APPLICATIONS

Plant and mine network operations

Integrator managed services

Network health reporting

## TECHNICAL HIGHLIGHTS

PROTOCOLS SNMP, ICMP, NetFlow, APIs

SCALE Thousands of devices

DEPLOYMENT On-premise or cloud

Indicative specifications, confirmed per project.

## INDUSTRIES

Mining

Manufacturing

Energy &amp; utilities

Ports &amp; logistics

Featured ITTC product, available through vertical partners.

**100% B2B.** Supplied through ITTC partner companies specialized in each vertical. Contact us for the partner in your sector, a quotation or a technical briefing.
